FEEDING DIRECTIONS: Food requirements will vary depending on environment, exercise and stress factors. Feed only the amount necessary to maintain optimum weight.

Adult dogs: Most adults can be fed once daily. When high activity or other factors create a higher food intake, twice-a-day feeding is recommended. Dogs should be maintained in a good body condition and not allowed to become overweight. The amount of food required for each dog will vary and should be adjusted accordingly.

Puppies: Puppies will start nibbling on solid food at 3-4 weeks of age. At least one week prior to weaning, introduce them gradually to All Breeds 21% Dog Food moistened with warm water or milk. Feed moistened until teeth are developed, gradually reducing liquid until you are feeding dry to keep teeth clean and gums healthy.

Feed growing puppies (to 6 months of age) all of the All Breeds 21% Dog Food they will consume at intervals throughout the day.

Reproduction: All Breeds 21% provides the extra nutrition needed by reproducing females in all stages of gestation and lactation. Food

Provide plenty of fresh, clean water in a clean container for your dog at all times.
